

I am a Respiratory Care Practitioner with 35+ years of direct patient care at University Teaching Hospitals as well as being a clinical instructor for our Critical Care Anesthesia team. When I met Michael Golub RRT, RN, I saw that he had a problem- solving mind when he showed me the SINODA. It was one of those “why didn’t I think of these moments!” Michael has 5 current products that have patents:

- 1. Triple-Port O2 Mask**
- 2. SINODA adapter**
- 3. Crown Adapter set.**
- 4. Oropharyngeal Airway**
- 5. Universal Bite-Block.**

I believe that all 5 of these products can have a positive impact on patient’s outcomes.
