

I'm happy to endorse the SINODA™ device set. As a Registered Respiratory Therapist, I keep a set with me at all times while working because I've found it to be an extremely useful and convenient tool in my daily practice.

The SINODA™ device set is practical, easy to carry, and a valuable addition to my everyday clinical equipment. It's something I personally use and appreciate, and I'm pleased to recommend it to fellow respiratory therapists and other healthcare professionals.

Sincerely,

Damon Wiseley, RRT
