

To Whom It May Concern:

My name is Don Sizemore, and I am writing in support of the SINODA product. Based on my experience using the product and testing multiple connection configurations, I believe SINODA provides a secure, cost-effective, and practical way to prepare for connections among nebulizers, oxygen delivery devices, and masks. In situations where non-standard connections would typically require extra adapters or loose parts, the SINODA product reduces the need to store, search for, and assemble separate connection pieces. This makes setup more efficient while helping maintain a reliable connection when flexibility and readiness are important.

A handwritten signature in cursive script that reads "Donald Sizemore".
