In the emergency room when a patient comes in with respiratory distress, every second matters. The SINODA adapter helps save some of those precious seconds. It is a multipurpose device that helps with delivering both oxygen and nebulization. Patients with COPD, Pneumonia, asthma, and even patients with a tracheostomy could find great use from this device. This device works for both adults and pediatrics populations and can improve outcomes with patients in the emergency room, where every single second counts.

Registered Respiratory Therapist

Steven Remy

A handwritten signature in black ink, appearing to read 'SR' followed by a stylized surname, likely 'Remy'.
