

Medical Device Endorsement

Device: SINODA™

I endorse this device for use in the Respiratory healthcare setting based on its performance, reliability, ease of use, and ability to support quality patient care.

This device is easily applicable in Respiratory and Pulmonary areas to deliver high concentrations of oxygen and inhaled medications at the same time it demonstrates value as an effective tool for Respiratory care and other healthcare professionals when used according to appropriate clinical guidelines and manufacturer recommendations.

Juan Caraballo, RRT

A handwritten signature in black ink, appearing to read 'J Caraballo', written in a cursive style.
